

# DCM Foundation

Hope for People with Dilated Cardiomyopathy

Follow Us

Founded in 2017, the DCM Foundation is a non-profit organization with a mission to provide hope and support to patients and families with Dilated Cardiomyopathy through **research**, **advocacy** and **education**.

## Did You Know?

**DCM runs in families**  
Your DCM may have a genetic basis.

Children likely have a 50% chance of inheriting the same genetic change that caused their parent's DCM.

DCM, even though easily detectable with a Heart Check, can be a silent disease for months or years.
